

Continuus partners with Sigma Computing to deliver real-time, governed data exploration and reporting that empowers business users to unlock the full value of the Snowflake Data Cloud. Together, we enable Financial Services organizations—especially highly regulated asset managers—to make faster, data-driven decisions by eliminating bottlenecks between data and insight.

Continuus brings over a decade of hands-on experience in enterprise data strategy, governance, and AI to every Sigma implementation. Our unique ability to bridge technical complexity and business context ensures clients can harness Sigma's intuitive, spreadsheet-like interface without compromising scalability, security, or performance.

With Continuus and Sigma, firms can accelerate time-to-insight, foster true self-service analytics, and operationalize data collaboration across the enterprise.

Empowering Self-Service Analytics at Scale

Continuus helps firms integrate Sigma seamlessly with Snowflake and other enterprise data platforms. We design and deploy governed frameworks that put the power of data directly in the hands of analysts, portfolio managers, and operational teams, while maintaining visibility and control for data stewards and IT.

Investment-Centric Dashboards & Reports

Leverage Continuus' deep expertise in asset management workflows to deliver real-time dashboards and interactive reports tailored for the front, middle, and back office. From performance attribution and risk metrics to investor relations and regulatory reporting, Continuus ensures every Sigma dashboard aligns with strategic business goals.

Modern Data Governance & Strategy

Continuus works hand in hand with clients to develop data operating models that support Sigma's self-service ethos. Our frameworks include data stewardship, access management, and lineage tracking, ensuring compliance without compromising agility.

AI-Augmented Insights with Sigma

Pair Sigma's powerful querying capabilities with Continuus' AI solutions to enable next-level insights. Whether it's using LLMs to surface contextual commentary on fund performance or embedding AI-generated risk alerts in Sigma dashboards, we help firms unlock intelligent, action-oriented analytics.
