# Data Architecture for AI

Data Driven Excellence: Custom Data Architectures to Enable Faster Time to Insight for Your Business

At Continuus, we leverage our expertise in foundational data governance concepts, models, and frameworks to tailor data strategies and governance programs for the unique needs and culture of each organization. We are skilled practitioners, with first-hand, direct business knowledge of the data challenges across the Financial Services industry. By focusing on business outcomes, we ensure the solutions we design go beyond the implementation of tools and technology and help our clients gain trust and confidence in their data to ultimately drive informed decisions and accelerate growth.

Continuus Enterprise Data Architecture Process

Goals & Vision	Discovery & Road Map	Proof of Concept & Planning	Design & Implementation	Testing & Support
• Align organizational goals to data requirements • Identify priority outcomes across business units • Define success metrics • Create a data strategy	• Identify current state processes • Identify current state architecture • Document gaps and goals for achieving outcomes • Create a road map to get there	• Identify a visible but not critical slice of the business to target • Implement the modern architecture for this small slice • Review and iterate with the business • Measure the improvement, present the next plan	• Onboard a team of CT and client staff • Create a design for the enterprise • Prioritize where to start • Begin agile execution	• Continuous feedback and updates • Begin staffing or re-skilling a blend of FTE's to support the new architecture • Review a managed service option • Constant check-ins on support and SLA's

Expert Data Enablement with Continuus

In partnership with Continuus, Snowflake can provide a fully managed data enablement program for AI. Clients moving forward with Snowflake Modern Data Architecture Designs from Continuus will receive:

- Modern QA and Observability
- Business Logic Migration from Legacy Datafeeds
  - Excel, APIs, CSVs, ERPs, and More
- Comprehensive Project Management
- Connected Enterprise Data Model
- Modern Dashboards Utilizing Streamlit
- Utilization of AI Throughout the Enterprise
  - Chatbots, Data Extraction from PDFs, Summarization at Scale

Modern Enterprise Data Infrastructure

Essential to the long-term success of your business. Partner with Continuus to build and implement a custom data infrastructure that supports self service, creates trusting data, and promotes optimal insights for the business.
